

Dr. Domenic Iacovone: The Future is Bright for Revive MD | Episode #042

written by Mike Roberto | February 23, 2021

Revive MD comes out *swinging* in 2021!

Ben is joined by *Revive MD's* **Dr. Domenic Iacovone** to discuss the Revive MD's present and future. Dr. Dom has a Bachelor's degree in Molecular Microbiology and went to Atlanta to get his Doctorate, completing his residency at the Synergy Sports Institute which is utilized by NFL players. With such a background, he's *always* trying to be innovative, and this episode shows just how much he's committing to that.

Dr. Dom is extremely excited to announce Revive MD is now providing blood tests for free to those with insurance and heavily discounted for those without insurance

The video and audio feeds are below, with more show notes after that:

NOW OFFERING BLOOD WORK

We're revolutionizing the health aspect of supplements yet again.

Revive MD is now offering free blood work to customers with qualified insurance. Get a comprehensive understanding of your blood work from a Revive Physician.

*Must provide proof of qualified insurance.
**Restrictions may apply to non-insured.

Revive MD is now offering free blood tests!

The advertisement features a dark blue background with white and light blue text. Below the text is a photograph of a male doctor in a dark blue scrub top sitting and talking to a female patient in a maroon scrub top who is seated in a white medical chair. The doctor is holding a small white bottle. The background of the photo shows a clinical setting with a white wall and a patterned curtain.

More than just a supplement brand, Revive MD is one of the only fully franchised medical facilities in the world, and every facility has an MD, a nurse practitioner, and a full-time nurse. They go where your standard primary care office is afraid to go, and where some are afraid to ask. For instance, they're not just a company providing hormones, they offer a myriad of additional services beside hormone replacement such as non-surgical facelifts, stem cell therapy, IV vitamin therapy, weight loss hormone replacement therapy, and more. Dr. Domenic explains that they staff physical therapists, and chiropractors.

Big on peptide therapy

However, Revive MD does not *push* hormones heavily, and is very big on peptide therapy. They're also very big on non-controlled substances to push the body to do what it's naturally supposed to do in the first place. Revive MD is research and science driven, but they work with *athletes*, and are coming hard at the "legal performance enhancement" side of the game.

Will Wallace hired on

Welcome William Wallace to Revive MD, their new Chief Compliance & Formulations Officer

As they're moving towards the future as an extremely unique company in the industry, Revive MD hired Will Wallace from Life Extension, who is worth his weight in gold. They continue to move very talented people to Florida, and Dr. Dom strives to ensure their entire business is built on education and intellectuals.

Looking to the future, Dr. Dom wants to be better than a brick and mortar store, he wants to be a "Whole Foods" of his niche. He doesn't mind the brick and mortar model, but his vision for Revive MD is bigger than that. They are planning some very exciting things for the future and will release products to brick and mortar before they are released to the public.

They also have a goal of supporting small businesses, which is critical in 2021. Additionally, Revive MD is working and collaborating with several professional athletes along with Will Wallace to bring out a big release that will be divulged at a later date.
