

# PEScience Alphamine Gets Two New Delicious Flavors: Sour Green Apple And Tropical Twist

written by Mike Roberto | May 16, 2020

**PE**SCIENCE

See our PEScience page to compare prices on all of their excellent supplements!

Over the years, **PEScience** has put out several high quality products that quickly became fan favorites, such as *Select Protein*, their *Prolific* pre workout, *High Volume* (stim-free pre workout), and of course, *Alphamine* – “The Athlete’s Energy Drink”. They’re known for incredible flavors, effective formulas, and being more scientific based than the majority of other supplement companies.

*Education, quality control, innovation, transparency, and effectiveness* are the primary factors that PEScience focuses on in order to produce the best supplements. Beyond creating phenomenal formulas, PEScience has some of the best tasting products around.

## PEScience Expands Alphamine’s Flavor Menu

PEScience consistently adds new flavors to offer their customers more options. Last time they came out with a new flavor for their sports performance supplement line, it was **Sour Green Apple**, originally released in *Prolific*, *Amino IV*, and *High Volume*.

They launched that flavor at the very beginning of 2020, and it instantly took

off. Before Sour Green Apple came onto the scene, their most recent flavor addition was **Tropical Twist** in *Prolific*. So now, it's only right for PEScience to add them to other products, and next is none other than **Alphamine**.

Alphamine is one of PEScience's staple products, and it's been around since 2012. The company *pioneered* the "fat burning cocktail" drink in an era where nearly *only* pills were sold. We now see fat burning drinks nearly everywhere – each and every one paying homage to one of the OGs in Alphamine. With its formula nailed down for clean energy, it's time to add some new refreshing flavors into the mix!

We have more information about the new flavors and Alphamine's formula down below, but before we go any further, make sure to subscribe to PEScience news and deal alerts so you don't miss out on future product and flavor releases!

## About The Flavors: Tropical Twist and Sour Green Apple

Tropical Twist and Sour Green Apple are now available in Alphamine, but are they worth picking up?

### Sour Green Apple: Finding The Right Balance

PEScience has brought several unique and delicious flavors to the market over the years, but one that seemed to be missing was... **Sour Green Apple**. Since other companies have come out with their own take on sour green apple, the popularity of the flavor has grown tremendously.

With PEScience's history, their fans knew they would nail the flavor, and started making several requests for it. Of course, PEScience made sure to fulfill the customer's demands and did so in a big way by coming out with three products straight away rocking the new Sour Green Apple flavor.

Now, you can also enjoy it in *Alphamine*, which is great on its own or stacks perfectly with High Volume before a big training session! While some Sour Green Apple products are way too sour, and others aren't sour enough, PEScience got the perfect balance between the two. It reminds us of sour green apple *candy* more than anything else.

### **Tropical Twist: For The Citrus Fruit Lover**

If sour drinks don't sound like your cup of tea, then maybe **Tropical Twist** would be a much better option! This flavor couldn't be more different than sour green apple, it's practically the complete opposite. Tropical Twist goes heavy on the citrus fruits by including flavor notes of both pineapple and orange.

New formula, new flavor, and new serving size!

It's a pretty unique combination, but they work extremely well together. Tropical Twist was first introduced to us in Prolific, PEScience's stimulant based pre workout, and is now available in Alphamine! Although there's no other products available in this flavor at the time of writing this blog post, the citrus flavor profile stacks well with various other flavor systems PEScience offers.

If you're a Sour Green Apple lover, but enjoy citrus as well and want to mix it up sometimes, then consider picking up both! Variety is key and PEScience offers a great selection of flavors to keep you coming back for more!

Now that you know about the two new flavors, let's briefly cover what Alphamine has to offer!

## Alphamine Ingredients

Alphamine was formulated to be a better alternative to energy drinks, and it also has some additional ingredients to *boost thermogenesis*. Although Alphamine can serve as a pre workout, it can be used anytime you need a boost of energy. It's a much better and more affordable option than reaching for a sugary coffee or energy drink.

Serving Size 1 Scoops (2.9 g)

Serving Per Container 60

---

Amount Per Serving

---

Alphamine Proprietary Blend 1,600mg \*

---

Choline Bitartrate, L-Carnitine-L-Tartrate, L-Ornithine, L-Theanine

---

DIRECTIONS: Mix 1 scoop with 6-8 oz water. Not for individuals sensitive to caffeine. Do not exceed 2 scoops per 6 hour period. Do not exceed 3 scoops per day.

Here's a look at Alphamine's new formula for 2020!

This post is primarily focused on the new flavors, but we did want to briefly cover Alphamine's formula. Here's what you'll find in one serving (2.9g) of Alphamine:

### **Alphamine Proprietary Blend (1,600mg)**

- **Choline Bitartrate**
- **L-Carnitine-L-Tartrate**
- **L-Ornithine**
- **L-Theanine**
- **Caffeine Anhydrous – 125mg**

You can learn more about each ingredient by going to our original article: *Alphamine Reformulated for Better Feels: The Sexiest Supplement*

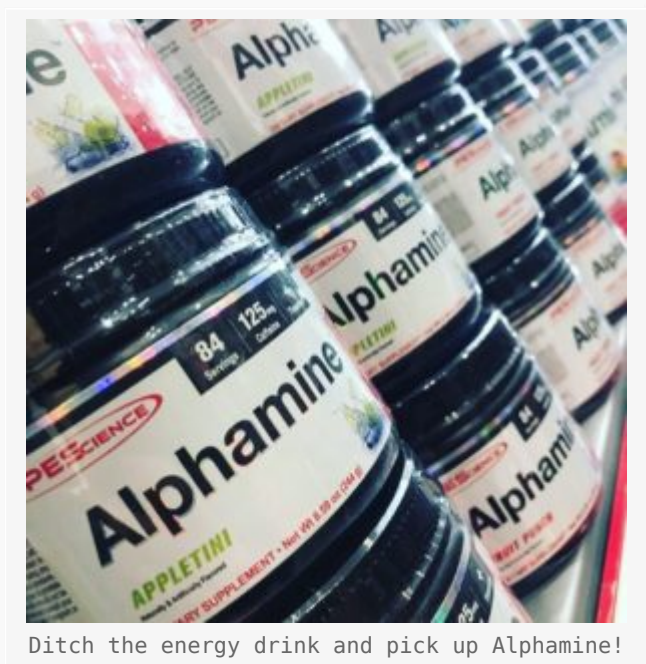

### **Alphamine: All Flavor Variations**

Besides Sour Green Apple and Tropical Twist, Alphamine also comes in several other delicious flavors. PEScience sets high standards, so they make sure every flavor lives up to its name before it goes to production. You can't go wrong with any option, just pick the one that sounds best to you!

Here's an updated list of all available flavors of Alphamine:

## Ditch The Energy Drink And Pick Up Alphamine!

Regardless of who you are, we're sure that you've felt that mid-afternoon crash creeping in and all you want to do is either reach for a sugary snack, take a powernap, grab an extra cup of coffee, or head to the vending machine to get an energy drink. Doing that once in a while really isn't that big of a deal, but it can quickly turn into a bad habit. Not only can those snacks and drinks pack in large amounts of calories, they also take a toll on your wallet.

Ditch the energy drink and pick up Alphamine!

The majority of coffees or energy drinks are overpriced, therefore daily consumption is a poor decision financially and for health. This is one of the reasons PEScience created Alphamine, which is known as "*the athlete's energy drink*". It contains key ingredients that boost your energy, such as caffeine anhydrous, and improve your body composition. Furthermore, it's a way cheaper option and tastes delicious, which can help curb your cravings!

Each bottle contains *84 servings* at only *\$35 before coupons* (such as our PRICEPLOW one), equaling well *under 40 cents per serving* when all is said and done. Try finding an energy drink that boosts thermogenesis, contains zero calories, and tastes amazing, for only 50 cents... we bet you won't be able to!

Alphamine is your solution to a mid-afternoon pick me up or an energy boost in the morning before cardio. The possibilities are endless! PricePLOW is excited to see what else PEScience has in store for 2020, because they're always up to something! And if you want to get notified when more flavors and products release from PEScience, then make sure to subscribe down below!
