# Black Magic BZRK Orange Cooler in Time for the Hot Summer of 2022

written by Mike Roberto | June 25, 2022

Less Suck; More Skill. It’s time for more Black Magic

We’re excited to announce that two *tasty new flavors* have been released by **Black Magic Supply** in June 2022, and we’re going to cover one of them today. The first is in Black Magic’s **BZRK pre-workout**, while the other, Honey Grahams *Multi-Source Protein* will get covered next.

For BZRK, previously released flavors include *Crystal Blue*, *Peach Rings*, *Mango Sunrise*, *Lemon Raz Icy*, *Haterade*, and *Cosmic Burst* – a list of flavors that tell you a thing or two about the brand’s *vibes*.

## BZRK Orange Cooler for the Hot Summer of 2022

Out just in time for summer, you have the option of buying **Orange Cooler**: a tangy citrus flavor with notes of *power* for those days when you need a burst of power before hitting the gym in nearly triple-digit heat. This get us back to the original BZRK formula after covering the incredible limited-edition 2022 *BZRK Voodoo* launch which may still be available in a few retailers.

## BZRK Pre-Workout Highlights:

Just in time for the HOT Summer of 2022, it's a new *Orange Cooler* flavor of BZRK

Each container of BZRK offers 25 *full* servings. At *21 grams per serving, you get*:

- An *ergogenic aid* blend with heavy-hitting *nitric oxide* (NO) boosting ingredients and *osmolytes* like citrulline, *GlycerPump, betaine*, and a special form of *beta-alanine* known as BetaO
- A *focus and stimulant blend* that includes *tyrosine* and **350 milligrams of caffeine**
- Energizing botanical blend employing the feel-good *Neurofactor* coffee fruit extract
- ***No*** yohimbe, yohimbine, or rauwolscine ("alpha-yo")

Let's check on prices and availability and get into some of the new details and research that we've learned since BZRK first launched:

If interested in the deeper details, you should still check out the original article because it has a more comprehensive ingredient analysis. Check out *Go BZRK: Black Magic Supply's Dark Sided Enigma of a Pre Workout*.

## Other flavors available

Not into citrus or orange? That's OK – Black Magic has plenty of other incredible (and interesting) flavors:

The latest flavor of one of retail's most popular pre-workouts ever!

Finally, if looking for even more variation, check out *BZRK Voodoo*, and get this: we've been alerted that another Voodoo flavor will be coming out before year's end!

### Back to BZRK mode with Black Magic Supply

When **Black Magic Supply** first hit the supplement scene, back in 2018, they were dubbed "the darker side of the Myoblox crew". Over the last few years, Black

Magic has won great success with their hardcore approach to supplement formulation. One example of their aggressive philosophy is **BZRK** pre-workout, a product with pretty big ingredient doses, including a potent 350 milligrams of caffeine per serving with more.

## BZRK Keeps Up with the Cool

BZRK Orange Cooler was launched in June of 2022, and anyone reading this in the future should remember that it was during a heat wave that spanned nearly the entire United States (hell, nearly the entire Northern Hemisphere). There are definitely some thermogenics inside, so this flavor was designed to be drank nice and *cold*.

We love that there are some aggressive ingredients inside, but no yohimbe / yohimbine / alpha-yohimbine ingredients in the mix. This allows for a more potent pre-workout that doesn't exclude those who are hypersensitive to those herbs.

As always, start with less than a full serving – this is a single scoop that hits *hard*, so you'll want to start your Orange Cooler Summer with less than a full scoop! And if you half-scoop it, you can always add pumps back in with the famous *Ecto Plasm* pump stacker!

Up next? Black Magic Supply's Multi-Source Protein now comes in *Honey Grahams* flavor!
