

Hosstile Supplements: Fouad Abiad's Relentless Takeover is Here

written by Mike Roberto | March 11, 2020

Building a successful business isn't much different from building an exceptional physique. They both take countless hours, patience, consistency, and a relentless drive to *never quit*, regardless of what anyone else says.

IFBB Pro Fouad Abiad has already reached the highest level of success in bodybuilding by earning his pro card and competing against some of the best in the world. Now, he's ready to show you just what he's capable of in an entirely different arena. However, the new industry he's entering has been a part of his life for many years, because a sound nutrition and training program goes hand in hand with proper supplementation to become the best.

Meet Hosstile Supplements by Fouad Abiad

Fouad Abiad achieved the highest level of success in bodybuilding by earning his IFBB pro card.

Fouad knows supplements don't work unless you do, but he also believes that they can really help take your training and physique to the next level. There's one caveat though – the supplements must contain the *best* ingredients on the market. They must be tested for purity, quality, and safety, and be backed by not only research, but *experience*.

In order to ensure you're getting products that deliver the best results, Fouad decided it was time to take matters into his own hands. **Hosstile Supplements** was created, which *Fouad and Sommer (Fouad's wife and business partner)* could not be more proud of.

The Hosstile Takeover!

Hosstile takes on a meaning far beyond supplements or clothing.

Fouad has spent years taking products from multiple companies – he loves to experiment and see what works and what doesn't. Although scientific research can point us in the right direction, at *Fouad's* level, testing the products in real world scenarios for extended periods of time is crucial to developing superior formulas. There are some things you just can't test in a lab, but can find that work for you and other elite training partners. So when it came time to start creating formulas and getting the perfect balance of ingredients, Fouad knew exactly what to do.

No Shortcuts.

From the packaging to the formulas and everything in between, Fouad wasn't about to take any shortcuts. He stands behind every product and has been using them for months, before they even launched. This is not one of those brands that just have a big name promoting the products, with no knowledge of what they're even for. Fouad wanted to create a brand that was by bodybuilders, for bodybuilders, and Hosstile means the world to him.

What Does Hosstile Mean?

You might be wondering, *"Isn't Hosstile spelled wrong?"* In this case, it's definitely not!

Throughout his successful bodybuilding career, he earned the nickname **"The Hoss"**, so that's where the brand's name came from. Also, before Hosstile

Supplements was born, Fouad launched a widely popular clothing line under the name of *Hosstile Brandwear*, so he decided it was the perfect name to carry over to another business venture!

Needless to say, Hosstile is becoming well-known worldwide, and the supplements are going to take it to the next level!

Here's a glimpse of what Hosstile means to Fouad:

"How do I describe HOSSTILE? I think the term has come from the aggressive attitude I have toward training and just life in general. I have been told no about many of my goals and dreams. I've had my own doubts and own demons to contend with. At the end of the day, being HOSSTILE to me is a willingness to ignore the negativity from society and from within, and keep pushing towards your goals. I have been saying sacrifice without regret for years, and that's HOSSTILE at its root. Chasing dreams, chasing goals, even if they aren't guaranteed, even if there is only a slim chance at success, we go anyway."

An Exclusive Look at Hosstile Supplements' First Launch

Now for the moment you've all been waiting for, a look at Hosstile's first round of products! As we mentioned, Fouad spent months getting everything as close to perfect as possible, and by looking at the formulas, you can tell he nailed it.

He even sent several samples out to people he trusts, to get feedback on what needed to be tweaked, before finalizing anything. Several people were very impressed with the initial samples, so we knew the end product was going to be solid.

"I tried the line without knowing the formulas. The serving size and results themselves impressed me. Knowing Fouad's philosophy on supplements I'm looking forward to simple but effective products."

– Ben Kane, Co-Host PricePLOW

As expected, they're starting out with the staple supplements Fouad uses on a very regular basis, such as *pre workout*, *intra workout*, and *amino acids*. Be on the lookout for many more to come as they expand the line, but here's what to expect from Hosstile Supplements' first product launch:

- **Hosstility – Comprehensive Pre Workout Formula**

Hosstility was the first product we teased here on the PricePLOW blog, but at

the time, we didn't get to show the full supplement facts panel! Now, the chains are off, and we're allowed to let you know all the details on this epic formula! Hosstility is their comprehensive pre workout supplement that's releasing in two delicious flavors: *Mango Punch* and *Watermelon*. If you know Fouad, he's got a sweet tooth, and crushes it with a refreshing drink, so he doesn't fall off track!

Hosstility is there comprehensive stimulant based pre workout. It will get you fired up for any workout!

Here's some key ingredients in Hosstility, that are designed to give you intense energy, focus, and help you get a pump!

- **L-Citrulline – 6g**
- **Creatine Monohydrate – 3g**
- **Betaine Anhydrous – 2.5g**
- **Arginine Nitrate (as N03-T) – 2.5g**

As you can see, they use several trademarked ingredients at generous doses, to create a comprehensive pre workout formula!

- **Bloodshot – Non Stim Pump and Focus**

Next, let's see what **Bloodshot** has in store! This is another pre workout supplement, and it's quite similar to *Hosstility*, except it's *stimulant-free*. This is for those late training sessions so you can still sleep at night, or you can also pair it with your favorite energy drink, fat burner, or even coffee if you're not willing to give those up for a stim-based pre workout.

But even better, Bloodshot would also be great to stack with *Hosstility* for fantastic doses of active ingredients (and you can customize your caffeine intake)! Bloodshot comes in two flavors: *Strawberry Kiwi* and *Watermelon*!

Here's what it has to offer to give you skin splitting pumps and laser focus:

Hosstile Supps Bloodshot is a non-stim pump and energy pre workout that can be stacked with Hosstility so you can decide how much caffeine you want!

- Taurine – 2g**

- L-Tyrosine – 1g**
- Beet Root Extract 2% Nitrate (as N03-T) – 600mg**
- Green Tea Leaf Extract 45% EGCG, 98% Polyphenols – 300mg**
- Huperzine A – 10 mg**

Both of Hosstile Supplements' pre workouts are stacked, they did a great job on these formulas! Now, let's see what else they have to offer!

• IntraR3 – Complete Intra Workout Formula

IntraR3 features several ingredients that help fuel your training session, so you can get the most out of every workout! It's launching in two refreshing flavors: *Orange* and *Watermelon*.

This is probably the most underrated product, because adding in some fast digesting carbs can make a huge difference in the way you perform, recover, and feel in the gym. You know *The Hoss* doesn't fear the carbs!

Here's what IntraR3 delivers:

Highly Branched Cyclic Dextrin (as Cluster Dextrin) – 15g

Hostile Supps Intra[R3] features fast digesting carbs and all nine essential amino acids to keep you working harder, for longer!

- Threonine – 1g
- Betaine Anhydrous – 1g

- **Silo9 – Essential Amino Acids**

Hosstile Supps Silo9 includes all nine essential amino acids and coconut water powder for hydration!

Last, but not least we have **Silo9**! As you can see from the name, it includes all nine essential amino acids, but unlike *IntraR3*, it *doesn't* have any carbs. This allows you to still maximize muscle protein synthesis without adding in

too many calories, which may be important if you're trying to cut down and keep blood sugar levels lower. Silo] comes in two unique flavors: *Pineapple Orange* and *Blueberry Lemonade*.

Here's the formula:

- **BCAA 2:1:1 Blend – 6g (3g Leucine, 1.5g Isoleucine, 1.5g Valine)**
