

Inspired Nutraceuticals RST (R.E.M. Sleep Therapy) Announced

written by Mike Roberto | April 20, 2022

Inspired Nutraceuticals is hot off their *Ember Non-Stim* launch, and have announced that there's more on the way:

Inspired Nutraceuticals RST: *R.E.M. Sleep Therapy*

Inspired Nutra's next supplement, **RST** (pronounced "Rest") stands for *R.E.M. Sleep Therapy*, and word is that it'll a completely new kind of sleep aid that's unlike anything we've seen before.

Chris Waldrum, Inspired Nutra's CEO and creative extraordinaire, told us *this* (and we're re-posting it *without* permission):

"I can't begin to tell you how excited we are to launch this product. In a category saturated with overly sedative and hormone laden ingredients, RST is totally unique in its approach to achieve the desired outcome of replenishing sleep.

Seriously can't wait to show you the formula and get you some to take."

– Chris Waldrum, Inspired Nutra CEO

That’s all we know, but it’s enough to get fired up about. It *seems* that this will be *melatonin-free* given what Chris is saying about “hormone laden ingredients” (melatonin is a hormone)... we’ll find out soon enough.
