## Myprotein Clear Whey Isolate Recap

Clear Whey Isolate is truly one of a kind – people are hooked on its *light, sweet, and refreshing* flavors, as well as its incredibly *smooth and near-juice-like consistency*. If you prefer amino acid powders over protein shakes, then you may consider this a worthy compromise.

It's important to note that this protein powder will create a small amount of foaming when mixed with water, so Myprotein recommends adding one scoop to *10-12 ounces of cold water*, and after shaking, *letting it sit for about one minute* to let the foam settle. Soon enough, you'll have a *colorful yet translucent* protein packed beverage!

Since we've already done a full product breakdown for Myprotein's Clear Whey Isolate, we will briefly touch on the macronutrients and ingredients used to create this epic protein packed drink!

Try to find a protein powder that beats those macronutrients and still delivers on flavor – very few and far between! Myprotein Clear Whey Isolate is *nearly* pure protein, which is just what you want from a protein powder. This allows you to enjoy the other macronutrients, like carbohydrates and fats, from real food, optimized to your dietary style!

Like all protein powders, you can also use Clear Whey Isolate to kickstart post-workout recovery or a snack between meals. It's very versatile, which is why we're not surprised that it's become a bestseller in the states.

## Clear Whey Isolate Ingredients

At this point, you're probably thinking that those macronutrients are too good to be true, however since Myprotein uses pure **hydrolyzed whey protein isolate** as the only source of protein in Clear Whey Isolate, then it all makes sense.

### The secret is in the *hydrolyzed whey isolate*

Hydrolyzed whey protein isolate is at minimum *90% protein by weight*, therefore it contains *virtually no carbohydrates, fats, sugars, or lactose*. It also helps create the consistency Myprotein is trying to achieve, since hydrolyzed whey protein is *very thin*.

The word *hydrolyzed* just means that the whey protein is "*partially digested*" by enzymes, which makes it easier and faster to digest. Hydrolyzed whey protein isolate is rich in *all nine essential amino acids*, including *leucine*, which help initiate *muscle protein synthesis*. There's a reason why whey protein dominates the supplement industry – because it's high quality and one of the most pure

forms of protein available.

In order to make the hydrolyzed whey protein isolate taste like *Wild Cherry* or *Peach Mango*, Myprotein uses both natural and artificial flavoring, along with *sucralose* and *acesulfame potassium (Ace-K)* as the sweeteners. This is how Clear Whey Isolate can taste as sweet as a juicy cherry or peach mango drink *without any sugar*.

## Flavor Variations

The Myprotein Clear Whey Isolate flavor lineup continues to grow with the addition of *Wild Cherry* and *Peach Mango*. We expect that several more flavors will be one the way, especially with how popular it is.

Here's an updated list of all available flavors for Clear Whey Isolate:

Also, if you're looking for a plant-based option, Myprotein also has Clear *Vegan Isolate*, which is the most unique vegan protein we've ever tried!
