

NutraBio Now Discloses 3rd Party Lab Tests!

written by Mike Roberto | March 27, 2017

There was a time (LONG ago) when buzzwords like “ultra concentrated” or “proprietary matrix” were embraced by the supplement industry. Those days are long gone now that consumers are more educated and demanding to know exactly what and how much of something goes into the supplements they purchase.

NutraBio has long been established as the supplement industry leader in *transparency*, even showing an online plant tour of their manufacturing facility. Now they’ve unveiled another layer of transparency with the brand releasing their **3rd party lab tests** to consumers!

We’ve got more info about the 3rd party tests below, but first, take a moment to check the best deal and sign up for alerts on your favorite NutraBio products:

3rd Party Lab Tests

Mark Glazier, CEO and founder of NutraBio, recently announced they are publicly releasing the 3rd party lab tests conducted on their rather extensive line of protein powders.[1] Available lab tests include any protein powder that was manufactured *after* December 31, 2016.

You can view a copy of the results by entering the lot number, located on the bottom of each tub, on NutraBio's third-party test results page. All protein results are live along with about a third of all others products, and the brand is adding more every day. See the image below for a close up:

Whey Protein Isolate
2 Pounds

Item: WPI2
Retail Price: \$64.99
Price: \$39.99

Third Party Test Results for Label Claim

We've begun listing our third part results for you to view. Click the link below to search for test results matching your lot number!
We apologize if the lot number you're looking for is not yet listed. We will do our best to quickly get new test results published promptly.

[Check My Lot Number ▶](#)

Here's the prompt after you click the "Test Results" tab on a given product page.

To go, simply click here. You can also find it by visiting the product page for your purchased protein on NutraBio's website, and clicking the "Test Results" tab, then clicking "Check My Lot Number" button. You can then enter in the lot number of your protein in the text box:

NUTRABIO
WITHOUT COMPROMISE SINCE 1996

Search Third Party Testing Results

Please enter the numerical portion of a lot number. Lot numbers are usually found on the bottom of our bottles.

[Search](#)

Simply enter your lot number, and you'll be able to view your own products batch lab test.

After the number is entered, click "Search" and you'll be taken to your test results which you can then view to see how your batch of protein checked out in the 3rd party lab tests!

Even More Testing!

As mentioned above, NutraBio is about $\frac{1}{3}$ of the way done in releasing 3rd-party tests on all other products, and is working to get better coverage of those as well. So if you have a new supplement manufactured in 2017 from them, give it a shot as well,

Say for example, you wanted to see how NutraBio's Creatine Monohydrate checked out in testing, you can do that now too! Simply follow the same steps as listed above and you'll eventually be able to view your own personal tubs batch test results!

An Owner's Touch

We've all seen Mark Glazier's passion for quality ingredients, but we didn't even realize the lengths he goes to. Each and every 3rd party lab result **for every raw ingredient** and every finished products is sent direct to his phone!

With this kind of instant access, Glazier is able to see the results even while his lab is processing them! NutraBio has always been about **No Prop Blends, No fillers, Full therapeutic dosages, no scams and published 3rd party lab results**, and this just emphasizes the point even more!

Check out this video of Mark Glazier detailing exactly how each and every single ingredient that NutraBio comes across is rigorously tested for quality and purity and that *this is actually the law* – companies that do *not* do this (and there are several) are not manufacturing within the federal guidelines:

Back in 2015, NutraBio had some other tubs bought off of the shelf and third-party tested.

Check out NutraBio's Free Samples!

PricePLOW has partnered with NutraBio to provide free samples! Head over to our **free supplement samples** page to see what they're offering this month!

NutraBio's 100% Whey Protein Isolate to the test, and it passed with flying colors!

The lab ran a batch of tests, and showed a *ton* of individual amino acids to prove that they weren't amino spiked. No surprise... **it passed with flying colors!**

To be specific, the tests showed that each scoop of NutraBio's Whey Protein Isolate contained **25.78g dry basis** and **24.54g as is**. Additionally, those tests also showed absolutely no free form amino spiking!

Mark and NutraBio have always talked the talked about quality and transparency, but they also walk the walk as you can see – and this has been going on for *decades*, not just years!

Takeaway

NutraBio is leading the charge for transparency within the industry as the first company we're aware of to give consumers access to 3rd party lab tests for **each and every single product** in their vast arsenal. This is quite the statement for NutraBio and one we can stand up and applaud. Now, if only the rest of the industry could follow their lead!
