

# Primeval Labs Electrolyte Now in Stick Packs and Strawberry Banana

written by Mike Roberto | July 30, 2022

*TL;DR: The incredible Primeval Labs Electrolyte supplement now has a phenomenal **Strawberry Banana** flavor, and all flavors are now available in **stick packs**!*

Last year we covered **Primeval Labs' Electrolyte** powder, which contains the special ingredient *CALCI-K*, a patented blend of calcium and potassium developed by Albion Human Nutrition.

Primeval Labs Electrolyte is now available in Stick Packs and a perfectly-blended Strawberry Banana Flavor

A good electrolyte supplement is not to be taken lightly. Although maintaining optimal hydration is absolutely *crucial* for achieving peak performance, hydrating with can actually *wash electrolytes out of your system*, basically *worsening* dehydration at the cellular level by altering the osmotic pressure of your cells.

We loved the Primeval Labs Electrolyte formula and we especially enjoyed the variety of flavors that were available at that time: if you want to read our full analysis of the product, see our article, *Primeval Labs Electrolyte: Let's Talk About CALCI-K*.

Today we have *two exciting updates* about this solid athletic supplement, and as you read above, they're a fantastic new *strawberry banana* flavor and a release of *stick packs*. Let's get into the details just after checking availability and our flavor review:

## Stick Packs Available!

Even the best electrolyte supplement formula in the world is usually hamstrung by one thing: its availability in *only powder tub form*.

It's not the biggest deal in the world, but still, having to pour measured scoops of powder into your water bottle is just one more little inconvenience to deal with as you prepare for your workout or outdoors work – and given how busy and overwhelmed most of us are these days, the bottom line is additional inconveniences *might* cause us to skip or forget our much-needed electrolytes on the way to our workout. Anyone who's tried to pour a scoop into a 16oz bottle of water knows.

## Just Grab And Go

Fortunately, **Primeval Labs** has released their **Electrolyte supplement in stick packs**: pre-measured individual servings that can easily be stored in your pockets or gym bag for *easy access when you need them*.

This is especially good for people who are often out and about under conditions that might require electrolyte replenishment, but *don't* want to carry a whole jar of powder with them everywhere they go.

Or, if you're getting ready to leave home, all you have to do is *grab a few stick packs and go*: no need to waste any time measuring or mixing before you're out the door. Toss it in the water bottle and you're good to go.

But that's not all:

## Strawberry Banana! New Primeval Labs Electrolyte Flavor

The other big announcement for Primeval Labs Electrolyte is that a new *Strawberry Banana* flavor is launching. It joins the ranks with *Orange Sherbet* and *Smashberry*, two popular flavors... but this one adds a bit more *fun* to the mix.

## All Flavors Currently Available

Once again, you can read our main *Primeval Labs Electrolyte* article to learn a bit more about the key potassium-driving ingredient, *CALCI-K* – there's also additional pink himalayan salt added for sodium!

More ways to *enjoy* ultimately means more hydrated, happy customers – something we’re very excited about! And as for this flavor system... it’s a *perfect* blend – not too much banana, but definitely not too little. But you’ll have to try it for yourself:
