

# Primeval Labs Primavar: A Highly-Dosed Laxogenin Capsule!

written by Mike Roberto | August 15, 2017

Primeval Labs continues its hot streak with the release of Primavar, a natural muscle-building supplement containing 125mg laxogenin per capsule.

**Primeval Labs** has steadily been cranking out top notch products month after month this year, including the likes of Sanctuary PCT, EAA Max, and most recently Ape Shit.

Now the relentless brand is set to enter the natural muscle builders category with **Primavar**, a 100% pure laxogenin supplement containing the highest single dose of laxo in a single capsule of any supplement on the market!

Before we get to the breakdown, take a moment to sign up for PricePlow alerts and receive the very best deals from around the web, but you can also see **PrimevalLabs.com** to compare against our coupons:

## Primavar Ingredients

As we stated above, Primavar contains the highest laxogenin dose of any supplement on the market. How much is that? A serious **125mg pure laxogenin per capsule!**

*Note: Doses listed below are based on 1 serving (i.e. 1 capsule).*

- **Laxogenin (125mg)**

Primavar contains an industry leading 125mg dose of pure laxogenin per capsule for a daily total of 250mg of the plant steroid.

Laxogenin (5a-Hydroxy Laxogenin) is an incredibly powerful anabolic agent

derived from *Smilax Sieboldii*, a plant related to asparagus. Sapogenins are analogues of compounds called brassinosteroids, which controls the expression of specific plant genes involved in growth.[1]

Laxogenin and other “plant-based steroids” can serve as precursors for the production various steroid hormones in the body[2], which is why laxogenin is at the top of our natural muscle builders list. It also increases protein synthesis and reduces protein breakdown.[1,3] More specifically, it’s believed that laxogenin can in fact enhance protein synthesis by as much as 200%![4]

Laxo isn’t just great for adding slabs of lean muscle mass either, it also offers several other prominent benefits including[5,6]:

- Regulated blood sugar levels
- Reduced stress
- Increased strength
- Cortisol regulation
- Lower LDL (“bad” cholesterol)
- Lessens pain
- Enhanced thyroid function
- Improved recovery

As you can see, laxogenin is ideal for just about everything – building muscle, recovering and improving overall health, making it a must ingredient for any athlete looking to enhance themselves without other more dangerous supplements such as steroids or prohormones. And with Primavar, you’re getting a beefier dose per serving than any other laxogenin product on the market.

Increased strength and recovery all without the need for PCT or cycle support. Are you ready for *plant steroids*?!

Overall, we think the best effect to expect from it is a small but noticeable strength boost, which is extremely helpful when stuck on a plateau, during PCT, or throwing everything and the kitchen sink at a strength problem.

## Dosing

Take 1 capsule twice daily for optimal results, per Primeval Labs.

## Takeaway

Primeval Labs continues its hot streak of releasing premium quality products that are extremely well dosed and effective. If you're a natural athlete and looking for something to up your gains, but don't want to risk of prohormones or other anabolics, you owe it to yourself to test drive Primavar and see what laxogenin can do for you. If ever there was a laxo product that could deliver, it's got to be this one packing its 125mg laxogenin per capsule.
