

FUTURE  *CEUTICALS*

What is S7™?

S7™ is a low-dose blend of 7 plant-based ingredients that has been clinically shown to increase nitric oxide (NO) by 230%.

S7™ refers to seven (7) simple (S) plant-based ingredients.

NO For Sport

NO acts as a *vasodilator*, signaling the surrounding muscle within the inner lining of blood vessels to relax, thus **increasing blood flow**.

This aids an athlete by delivering more oxygen to exercising muscles as well as fuel and other key nutrients utilized during workouts.

S7™ Published Pilot Study

Purpose: Measure the effects of a proprietary plant-based supplement (S7™) related to how it influences **circulating NO concentration** within healthy human participants.

- N=8 Healthy Subjects 24-55 years old
- Double-blind, crossover, placebo-controlled
- Single dose: 50mg

One 50mg dose of S7™ has been shown to deliver a surge of internal NO production at a significant rate.

Abstract Article: <https://www.ncbi.nlm.nih.gov/pubmed/29110555>

What sets S7™ apart?

1. S7™ is NOT an ingested nitrate product. Rather, S7™ triggers the best kind of NO production – your body's own.
2. We are able to quantify circulating NO within the human body.
3. Well-known NO ingredients have large serving sizes, S7™ delivers documented results at only 50mg

S7™ Applications

PRE-WORKOUT

MUSCLE PUMP

PERFORMANCE PRODUCTS

ENERGY DRINKS

S7™ Benefits

- Clinically verified results
- Quantifiable 230% NO Boost
- Stimulates internal NO production- Nitrate-Free
- Big boost from only 7 plant-based ingredients
- Versatile- low dose and soluble
- Branded- Exclusive to FutureCeuticals

Unlock your NO potential!
