

PARTIES

1. Plaintiff Katie Melara is and at all times relevant was a citizen of the state of California, domiciled in Los Angeles, California.

2. Defendant PEScience, LLC is a Delaware limited liability company with its principal place of business in Largo, Florida. On information and belief all decisions regarding formulation and labeling of the Products are made at this principal place of business.

JURISDICTION AND VENUE

3. This Court has subject matter jurisdiction over this action pursuant to the Class Action Fairness Act, Pub. L. 109-2, 119 Stat. 4 (codified in scattered sections of Title 28 of the United States Code); specifically, under 28 U.S.C. § 1332(d), which provides for the original jurisdiction of the federal district courts over “any civil action in which the matter in controversy exceeds the sum or value of \$5,000,000, exclusive of interest and costs, and [that] is a class action in which . . . any member of a class of plaintiffs is a citizen of a State different from any defendant.” 28 U.S.C. § 1332(d)(2)(A).

4. Plaintiff seeks to represent Class members who are citizens of states different from the Defendant.

5. The matter in controversy in this case exceeds \$5,000,000 in the aggregate, exclusive of interests and costs.

6. In addition, “the number of members of all proposed plaintiff classes in the aggregate” is greater than 100. *See* 28 U.S.C. § 1332(d)(5)(B).

7. In the alternative, the Court has jurisdiction over this matter pursuant to 28 U.S.C. § 1332(a). The amount in controversy exceeds \$75,000, exclusive of interest and costs.

8. This Court has personal jurisdiction over Defendant because this action arises out of and relates to Defendant’s contacts with this forum.

9. Those contacts include but are not limited to sales of the Products directly to commercial and individual consumers located in this district, including Plaintiff; shipping the Products to commercial and individual consumers in this district, including Plaintiff; knowingly

1 directing advertising and marketing materials concerning the Products into this district through
2 wires and mails, both directly and through electronic and print publications that are directed to
3 commercial and individual consumers in this district; and operating an e-commerce web site
4 that offers the Products for sale to commercial and individual consumers in this district, as well
5 as offering the Products for sale through third-party e-commerce websites, through both of
6 which commercial and individual consumers residing in this district have purchased the
7 Products.

8 10. Defendant knowingly directs electronic activity and ships the Products into this
9 district with the intent to engage in business interactions for profit, and it has in fact engaged in
10 such interactions, including the sale of the Products to Plaintiff.

11 11. Defendant also sells the Products to retailers and wholesalers in this district for
12 the purpose of making the Products available for purchase by individual consumers in this
13 district.

14 12. Plaintiff's losses and those of other Class members were sustained in this district.

15 13. Venue is proper pursuant to 28 U.S.C. § 1391(b)(2) because a substantial part of
16 the events or omissions giving rise to Plaintiff's claims occurred within this district.

17 14. Venue is also proper pursuant to 28 U.S.C. § 1391(c)(2) because this Court
18 maintains personal jurisdiction over Defendant.

19 **FACTUAL ALLEGATIONS**

20 15. Millions of Americans consume specific amounts of protein in order to lose or
21 maintain weight, build muscle, and meet fitness goals.¹ The past several decades have seen not
22 only the rise of protein-centered diets such as the Atkins, paleo, or keto diets—which require
23 adherents to carefully track “macros,” including protein—but also increased evidence that a
24 protein-heavy diet can be critical to supporting muscle growth, making weight training more
25 efficient, and helping with weight loss and maintenance. In fact, “several clinical trials” have
26

27 ¹ See, e.g., Heather J. Leidy, “Increased Dietary Protein as a Dietary Strategy to Prevent and/or
28 Treat Obesity,” MO. MED. (Jan./Feb. 2014), *available at*
<https://pmc.ncbi.nlm.nih.gov/articles/PMC6179508/>.

1 found that a high-protein diet “not only reduces body weight (BW), but also enhances body
2 composition by decreasing fat mass while preserving fat-free mass (FFM),” more so than “both
3 low-calorie and standard-calorie diets.”²

4 16. Central to the tracking of protein consumption is accurate nutritional labeling of
5 foods and dietary supplements. As noted by U.S. Food and Drug Administration (“FDA”)
6 Commissioner Margaret Hamburg during an October 2009 media briefing, “[s]tudies show that
7 consumers trust and believe the nutrition facts information and that many consumers use it to
8 help them build a healthy diet.” FDA recommends relying on Nutrition Facts panels on food
9 labels as primary “tool for monitoring consumption of protein.”³

10 17. Plaintiff Katie Melara is one of those millions of Americans. She tracks her protein
11 intake and takes a daily protein powder supplement to ensure she gets enough protein in her diet.
12 She does so in order to maintain her weight and meet fitness goals. As such, ensuring that she
13 eats at least the Recommended Daily Value of protein—and more generally that she is able to
14 accurately track her protein intake—is important to Ms. Melara.

15 18. As part of this effort and to assist in meeting her protein consumption goals,
16 Plaintiff purchased the Products through Amazon.com on or about July 30, 2023; June 6, 2023;
17 April 25, 2023; March 15, 2023; and February 3, 2023, and consumed the Products on a daily
18 or near-daily basis in that time.

19 **A. Protein Quality and PDCAAS.**

20 19. Amino acids are the building blocks of proteins, whether that protein is derived
21 from animals or plants. Both animal and plant proteins are composed of approximately 20 amino
22 acids, which are essential for the synthesis of body proteins and other important nitrogen-
23 containing compounds such as creatine, peptide hormones, and some neurotransmitters.

24
25
26 ² Jaecheol Moon & Gwanpyo Koh, “Clinical Evidence and Mechanisms of High-Protein Diet-
Induced Weight Loss,” 29 J. OBESITY & METABOLIC SCI. 166-73 (2020), *available at*
27 <https://pmc.ncbi.nlm.nih.gov/articles/PMC7539343/>.

28 ³ FDA, “Interactive Nutrition Fact Label – Protein,” *available at*
https://www.accessdata.fda.gov/scripts/InteractiveNutritionFactsLabel/assets/InteractiveNFLProtein_October2021.pdf.

20. There are nine amino acids that are not created by the human body: histidine, isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan, and valine, called “essential amino acids.” Human beings must consume these amino acids by digesting meat, animal products, plants, and other protein-rich foods that contain them.⁴

21. However, not all protein sources are created equally. Various protein sources contain all of the nine essential amino acids, while other protein types contain fewer of these amino acids. Thus, the *quantity* of protein by itself does not tell the full story of protein from a human nutritional standpoint. A protein’s *quality* is also critical because humans cannot fully digest or utilize some proteins, while other proteins are missing essential amino acids.

22. Protein sources that contain all or almost all of the essential amino acids are considered higher-quality proteins. These higher-quality proteins also tend to have a higher “bioavailability,” a term connoting the digestibility or the absorptive quality of a protein, *i.e.*, the ease with which the protein can be accessed and used by the human body in building muscle and undertaking other tasks.⁵

23. Scientists have developed a measure of protein quality called the Protein Digestibility Corrected Amino Acid Score, or PDCAAS.

24. The PDCAAS method combines a protein source’s amino acid profile and its percent digestibility into a discount factor ranging from 0.0 to 1.0 that, when multiplied by the total protein quantity, shows how much protein in a product is actually available to support human nutritional requirements.⁶ The regulations term this the “corrected amount of protein per serving.” 21 C.F.R. § 101.9(c)(7)(ii).

⁴ M.J. Lopez & S.S. Mohiuddin, “Biochemistry, Essential Amino Acids.” In StatPearls [Internet] (2025), available at <https://www.ncbi.nlm.nih.gov/books/NBK557845/>.

⁵ See generally Claire Gaudichon & Julianne Calvez, “Determinants of amino acid bioavailability from ingested protein in relation to gut health.” 24 CURR. OP. CLIN. NUTR. & METABOLIC CARE 55 (2021), available at <https://pmc.ncbi.nlm.nih.gov/articles/PMC7752214/>; Stephan van Vliet, Nicholas Burd & Luc van Loon, “The Skeletal Muscle Anabolic Response to Plant- versus Animal-Based Protein Consumption.” 145 J. NUTR. 1981 (2015), available at <https://pubmed.ncbi.nlm.nih.gov/26224750/>.

⁶ Gertjan Schaafsma, “The protein digestibility-corrected amino acid score,” 130 J. NUTR. 1865S-67S (2000), available at <https://pubmed.ncbi.nlm.nih.gov/10867064/>.

1 25. Proteins have a range of PDCAAS. Animal-derived proteins such as cow's milk,
2 eggs, and whey have PDCAAS at or near 1.0. Soy also has a PDCAAS that is close to 1.0, while
3 other plant-derived proteins have PDCAAS scores below 1.0—often much lower than 1.0—
4 such as 0.7 for peas, 0.52 for peanuts, 0.5 for rice, and 0.42 for wheat.⁷

5 26. A PDCAAS of 1.0 signifies that the protein is a complete protein with optimal
6 digestibility. A PDCAAS of 0.5 means that only half of the protein in that product is actually
7 available to support human protein needs. If that product contained 10 grams total protein per
8 serving, the “corrected” amount of protein in that product as described in 21 C.F.R. §
9 101.9(c)(7)(ii) would be only 5 grams per serving. Thus, protein products can vary widely in
10 their ability to support human protein needs—even between two similar products with the same
11 total amount of protein.

12 **B. PDCAAS and Food Labeling**

13 27. Because the PDCAAS method makes the differences in bioavailability among
14 different types of proteins apparent to consumers, it has a critical role to play in nutritional
15 labeling under relevant FDA regulations.

16 28. The FDA and other federal bodies set “Recommended Daily Values” for nutrients
17 such as protein, which is the amount of that nutrient that the FDA recommends that a normal
18 adult (or some other specified demographic) should consume every day to preserve their health
19 and eat a balanced and nutrition diet. In the Nutrition Facts panel of foods (or the “Supplement
20 Facts” panel of a dietary supplement), food manufacturers report the percentage of the
21 Recommended Daily Value (“%DRV”) provided by a serving of the food or supplement. *See*
22 FDA, “Daily Value on the Nutrition and Supplement Facts Labels,” *available at*
23

24
25
26 ⁷ *Id.* See also Joyce Boye, Ramani Wijesinha-Bettoni & Barbara Burlingame, “Protein quality
27 evaluation twenty years after the introduction of the protein digestibility corrected amino acid
28 score method,” 108 BR. J. NUTR. S183–S211 (2021), *available at*
<https://www.cambridge.org/core/journals/british-journal-of-nutrition/article/protein-quality-evaluation-twenty-years-after-the-introduction-of-the-protein-digestibility-corrected-amino-acid-score-method/51E5092761DA6004F1B081B204AAAB99>.

<https://www.fda.gov/food/nutrition-facts-label/daily-value-nutrition-and-supplement-facts-labels>.

29. FDA regulations state that if a Nutrition Facts or Supplement Facts panel expresses the protein content of a food in terms of %DRV, that disclosure must conform to and incorporate the PDCAAS method. That is, if reported, the %DRV must be “equal to the actual amount of protein (gram) per serving multiplied by the amino acid score corrected for protein digestibility,” which “shall be determined by methods given in sections 5.4.1, 7.2.1, and 8.00 in ‘Report of the Joint FAO/WHO Expert Consultation on Protein Quality Evaluation.’” 21 C.F.R. § 101.9(c)(7)(ii). *See also* Food Labeling: Nutrient Content Claims, General Principles, Petitions, Definition of Terms; Definitions of Nutrient Content Claims for the Fat, Fatty Acid, and Cholesterol Content of Food, 58 Fed. Reg. 2302, 2344 (Jan. 6, 1993) (when a nutritional label presents %DRV of protein it “must represent the corrected amount of protein based on its PDCAAS”).

30. These regulations are grounded in a recognition that 10 grams of pea or rice protein per serving does not offer the same %DRV of protein per serving as 10 grams of whey protein, because of whey protein’s 1.0 PDCAAS versus the much lower PDCAAS of pea and rice proteins. If the %DRV of a food containing such proteins is reported, it must be “corrected” by applying the PDCAAS of pea protein in the manner set forth in 21 C.F.R. § 101.9(c)(7)(ii).

31. There is a second instance in which manufacturers are required to report a PDCAAS-corrected %DRV in nutritional panels. Some foods or supplements make a “protein claim,” which is a claim outside of the Nutrition Facts or Supplement Facts panel that “characterize[s] the amount of protein in the products.” *Nacarino v. Kashi Company*, 77 F.4th 1201, 1205 (9th Cir. 2023). These are often front label claims that a food contains “20 grams protein per serving,” or the like.

32. When a food makes a protein claim outside of the Nutrition Facts or Supplement Facts panel, the food manufacturer ***must*** disclose the PDCAAS-corrected %DRV in the panel. *See* 21 C.F.R. § 101.9(c)(7)(i). *See also Nacarino*, 77 F.4th at 1209 (“[I]f a product label includes

1 a protein claim *outside* the [Nutrition Facts panel], section 101.9(c)(7)(i)’s trigger provision
 2 requires the manufacturer to also include the PDCAAS-corrected percent daily value *inside* the
 3 NFP”) (emphases in original); 1211 (“The text and structure of the FDA regulations demonstrate
 4 that Defendants’ protein claims could be misleading if ... the products did not display the
 5 quality-adjusted percent daily value in the NFP.”).

6 33. FDA has stated in guidance to the public that “Food manufacturers may
 7 *voluntarily* list the %D[R]V of protein per serving on the Nutrition Facts label, but they are
 8 *required* to list the %D[R]V of protein if a statement is made on the package labeling about the
 9 health effects or the amount of protein (for example, ‘high’ or ‘low’) contained in the food.”⁸

10 34. The reason for this requirement—that a food making a protein claim must display
 11 a PDCAAS-corrected %DRV in the Nutrition Facts panel—is to allow “consumers to readily
 12 identify foods of low protein quality.” Food Labeling: Mandatory Status of Nutrition Labeling
 13 and Nutrient Content Revision, Format for Nutrition Label, 58 Fed. Reg. 2,079, 2,102 (1993).
 14 FDA’s regulations recognize this requirement as “an important part of nutrition labeling.” *Id.* at
 15 2,103.

16 35. The regulations set forth FDA’s expert conclusion that (1) when manufacturers
 17 tout an amount of protein on the front label, that amount is likely to be material to the purchasing
 18 decisions of reasonable consumers, especially if the total amount of protein those consumers
 19 need to ingest on a daily basis to meet their Recommended Daily Value is not disclosed, and (2)
 20 not all proteins are the same in their ability to meet human nutritional requirements, so a simple
 21 statement about the number of grams does not actually inform consumers about how much
 22 usable protein they are receiving or how many servings they might need to consume meet their
 23 consumption goals.

24 36. Reporting of an accurate %DRV is especially important to the class of “protein-
 25 conscious consumers” who purchase protein-fortified products such as the Products, especially
 26

27 ⁸ FDA, “Interactive Nutrition Fact Label – Protein,” *available at*
 28 https://www.accessdata.fda.gov/scripts/InteractiveNutritionFactsLabel/assets/InteractiveNFLProtein_October2021.pdf (emphases in original)

those who count protein macros or who otherwise track their protein intake. *Nacarino*, 77 F.4th at 1212.

37. Consumers rely on nutritional labeling to make informed decisions regarding the amount of a food or supplement they must consume to achieve their protein consumption goals, and to contextualize protein claims made on front label or otherwise outside of the nutritional panels.

38. A protein claim on a food or supplement is deceptive and misleading to consumers if it is not accompanied by a PDCAAS-corrected %DRV disclosure in the Nutrition Facts or Supplement Facts panel, because it gives reasonable consumers the impression that all of the protein in a product is high-quality protein that is bioavailable to consumers.

39. PEScience makes a protein claim on the Products' front label (or "principal display panel") that the Products contain 20 grams of protein per serving:

40. The label also encourages consumers to "Taste the Quality" and "Select the Best," which further emphasizes the quality of the protein in the Products.

41. The Products use pea and rice protein as the sole protein sources. The PDCAAS of such proteins is significantly less than 1.0.

42. Because of the protein claim on the front label, PEScience is required under 21 C.F.R. § 101.9(c)(7) to report a PDCAAS-corrected %DRV in the Nutrition Facts panel of the Products.

43. It does not. Instead, the Nutrition Facts panel on the Products states that the 20 grams of lower-quality protein in the Products provides 40 percent of the Recommended Daily Value, as shown here:

Nutrition Facts	
27 Servings Per Container	
Serving Size 1 Scoop (29.5g)	
Amount Per Serving	
Calories	110
% Daily Value*	
Total Fat 1 g	1%
Saturated Fat 0 g	0%
Trans Fat 0 g	
Cholesterol 0 mg	0%
Sodium 140 mg	6%
Total Carbohydrate 3 g	1%
Dietary Fiber 1 g	4%
Total Sugars 0 g	
Includes 0g Added Sugars	0%
Protein 20 g	40%
Vit. D 0 mcg 0%	Potas. 6 mg 0%
Iron 0 mg 0%	Calcium 7 mg 0.5%
* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.	
Ingredients: Pea Protein Concentrate, Brown Rice Protein Concentrate, Natural Flavor, Stevia Extract, Salt, Guar Gum.	

44. The protein claim on the principal display panel of the Products is deceptive and misleading to reasonable consumers because that claim is not clarified and contextualized by the disclosure of the quality-adjusted percent daily value in the Nutrition Facts panel.

C. Plaintiff Reasonably Relied on Defendant's Labelling Statements.

45. Labels are the chief means by which food product manufacturers convey critical information to consumers, and consumers have been conditioned to rely on the accuracy of the claims made on these labels.

1 46. Consumers including Plaintiff especially rely on label claims made by food
2 product manufacturers such as Defendant, as they cannot confirm or disprove those claims
3 simply by viewing or even consuming the Products.

4 47. Further, federal law and corresponding state law and regulations both reflect and
5 create reasonable consumer expectations concerning the contents of foods and beverages. That
6 is, consumers have been conditioned to rely on the %DRV disclosures in a Nutrition Facts or
7 Supplement Facts panel when determining how much of a food product they need to consume
8 to obtain a specific amount of protein in their diet.

9 48. Plaintiff reviewed the front label and Nutrition Facts panel on the Products prior
10 to her purchase, and reviewed the statements regarding protein being made in both places.
11 Consumers such as Plaintiff who viewed the Products' labels reasonably understood the
12 Products to contain 20 grams of fully bioavailable, high-quality protein, comprising 40 percent
13 of the Recommended Daily Value of protein. This representation was false.

14 49. Consumers including Plaintiff reasonably relied on these label statements such
15 that they would not have purchased the Products from Defendant if the truth about the Products
16 was known, or would have only been willing to pay a substantially reduced price for the Products
17 had they known that Defendant's representations were false and misleading.

18 50. In the alternative, because of its deceptive and false labelling statements,
19 Defendant was enabled to charge a premium for the Products relative to key competitors'
20 products, or relative to the average price charged in the marketplace.

21 51. In addition to being unlawful under the FDA regulations cited herein, Defendant's
22 prominent protein claim on the front of the package, in the absence of any statement of the
23 corrected amount of protein per serving expressed as a %DRV in the Nutrition Facts panel, is
24 also likely to mislead reasonable consumers. Unless they are told otherwise, consumers
25 reasonably expect that Defendant's Products will actually provide the full amount of
26 bioavailable protein per serving claimed on the front of the package and stated in the protein
27 quantity section of the Nutrition Facts panel, *i.e.*, that the Products contain high quality proteins.
28

1 But Defendant's products do not. Instead, they consist of low-quality proteins that are not
2 bioavailable.

3 52. Had Defendant included a statement of the corrected amount of protein per serving
4 in the Nutrition Facts panel, as it was required to do under federal and state law, that disclosure
5 would have revealed that less than half of the total protein quantity in the Products is useable by
6 the human body, and that the Products contain low quality proteins.

7 53. That information was material to reasonable consumers, especially the class of
8 protein-conscious consumers who are the target market of the Products. The absence of this
9 information also allowed Defendant to charge a price premium to consumers including Plaintiff.

10 54. Plaintiff suffered economic injury by Defendant's fraudulent and deceptive
11 conduct as stated herein, and there is a causal nexus between Defendant's deceptive conduct and
12 Plaintiff's injury.

13 **CLASS ACTION ALLEGATIONS**

14 55. Plaintiff brings this action individually and as representative of all those similarly
15 situated pursuant to Federal Rule of Civil Procedure 23 on behalf of all consumers in the state
16 of California who purchased the Products within four years prior to the filing of this Complaint.

17 56. Excluded from the Class are Defendant and its affiliates, parents, subsidiaries,
18 employees, officers, agents, and directors. Also excluded are any judicial officers presiding over
19 this matter and the members of their immediate families and judicial staff.

20 57. Plaintiff reserves the right to alter the Class definition, and to amend this
21 Complaint to add additional Subclasses, as necessary to the full extent permitted by applicable
22 law.

23 58. Certification of Plaintiff's claims for class-wide treatment is appropriate because
24 Plaintiff can prove the elements of the claims on a class-wide basis using the same evidence as
25 individual Class members would use to prove those elements in individual actions alleging the
26 same claims.

1 59. **Numerosity – Rule 23(a)(1):** The size of the Class is so large that joinder of all
2 Class members is impracticable. Plaintiff believes and avers there are thousands of Class
3 members geographically dispersed throughout the state of California.

4 60. **Existence and Predominance of Common Questions of Law and Fact – Rule**
5 **23(a)(2), (b)(3):** There are questions of law and fact common to the Class. These questions
6 predominate over any questions that affect only individual Class members. Common legal and
7 factual questions and issues include but are not limited to:

- 8 a. Whether the marketing, advertising, packaging, labeling, and other promotional
9 materials for Defendant's Products is misleading and deceptive;
10 b. Whether a reasonable consumer would understand Defendant's protein claim to
11 indicate that the Products contain 20 grams of fully bioavailable high-quality
12 protein and provide a specific percentage of the Daily Recommended Value of
13 protein, and reasonably relied upon those representations;
14 c. Whether Defendant was unjustly enriched at the expense of the Plaintiff and Class
15 members;
16 d. Whether Defendant breached an express warranty;
17 e. the proper amount of damages;
18 f. the proper scope of injunctive relief; and
19 g. the proper amount of attorneys' fees.

20 61. Defendant engaged in a common course of conduct in contravention of the laws
21 Plaintiff seeks to enforce individually and on behalf of the Class. Similar or identical violations
22 of law, business practices, and injuries are involved. Individual questions, if any, pale by
23 comparison, in both quality and quantity, to the numerous common questions that predominate
24 this action. The common questions will yield common answers that will substantially advance
25 the resolution of the case.

26 62. In short, these common questions of fact and law predominate over questions that
27 affect only individual Class members.
28

1 63. **Typicality – Rule 23(a)(3):** Plaintiff's claims are typical of the claims of the Class
2 members because they are based on the same underlying facts, events, and circumstances
3 relating to Defendant's conduct.

4 64. Specifically, all Class members, including Plaintiff, were harmed in the same way
5 due to Defendant's uniform misconduct described herein; all Class members suffered similar
6 economic injury due to Defendant's misrepresentations; and Plaintiff seeks the same relief as
7 the Class members.

8 65. There are no defenses available to Defendant that are unique to the named
9 Plaintiff.

10 66. **Adequacy of Representation – Rule 23(a)(4):** Plaintiff is a fair and adequate
11 representative of the Class because Plaintiff's interests do not conflict with the Class members'
12 interests. Plaintiff will prosecute this action vigorously and is highly motivated to seek redress
13 against Defendant.

14 67. Furthermore, Plaintiff has selected competent counsel who are experienced in
15 class action and other complex litigation. Plaintiff and Plaintiff's counsel are committed to
16 prosecuting this action vigorously on behalf of the Class and have the resources to do so.

17 68. **Superiority – Rule 23(b)(3):** The class action mechanism is superior to other
18 available means for the fair and efficient adjudication of this controversy for at least the
19 following reasons:

- 20 a. the damages individual Class members suffered are small compared to the burden
21 and expense of individual prosecution of the complex and extensive litigation
22 needed to address Defendant's conduct such that it would be virtually impossible
23 for the Class members individually to redress the wrongs done to them. In fact,
24 they would have little incentive to do so given the amount of damage each member
25 has suffered when weighed against the costs and burdens of litigation;

- b. the class procedure presents fewer management difficulties than individual litigation and provides the benefits of single adjudication, economies of scale, and supervision by a single Court;
- c. the prosecution of separate actions by individual Class members would create a risk of inconsistent or varying adjudications, which would establish incompatible standards of conduct for Defendant; and
- d. the prosecution of separate actions by individual Class members would create a risk of adjudications with respect to them that would be dispositive of the interests of other Class members or would substantively impair or impede their ability to protect their interests.

69. Unless the Class is certified, Defendant will retain monies received as a result of its unlawful and deceptive conduct alleged herein.

70. Unless a class-wide injunction is issued, Defendant will likely continue to advertise, market, promote, and sell its Products in an unlawful and misleading manner, as described throughout this Complaint, and members of the Class will continue to be misled, harmed, and denied their rights under the law. Defendant continues to mislabel the Products in the manner described herein and sell them to the consuming public. Defendant would like to purchase the Products and other products sold by Defendant in the future, but cannot currently do so because she cannot rely on the Products' labelling, given the deceptions regarding protein quality found there. An injunction prohibiting future deceptive labelling is therefore warranted and would provide Plaintiff and the Class relief.

71. Furthermore, Plaintiff has not merely alleged an "informational" injury, but has also alleged that Defendant has been enabled to charge a price premium for the Products. Plaintiff has therefore alleged that compliance with federal and state regulations regarding the accurate reporting of protein content and quality in the Products would cause a decrease in the price of the Products at which Plaintiff and members of the Class would be willing to buy the

1 Products. As a result, Plaintiff has alleged more than simply an interest in Defendant telling the
2 truth on its labels, but an economic injury that further supports prospective injunctive relief.

3 72. **Ascertainability.** To the extent ascertainability is required, the Class members are
4 readily ascertainable from Defendant's records and/or its agents' records of retail and online
5 sales, as well as through public notice.

6 73. Defendant has acted on grounds applicable to the Class as a whole, thereby
7 making appropriate final injunctive and declaratory relief concerning the Class as a whole.

8
9 **COUNT 1**
10 **VIOLATION OF THE CONSUMER LEGAL REMEDIES ACT,**
11 **CAL. CIV. CODE § 1750 *et seq.***

12 74. Plaintiff realleges the preceding paragraphs as if fully set forth herein and, to the
13 extent necessary, pleads this cause of action in the alternative.

14 75. Plaintiff is a "consumer" within the meaning of the Consumer Legal Remedies
15 Act ("CLRA"), Cal. Civ. Code § 1761(d).

16 76. The sale of Defendant's Products to Plaintiff and Class members was a
17 "transaction" within the meaning of the CLRA, Cal. Civ. Code § 1761(e).

18 77. The Products purchased by Plaintiff and Class members are "goods" within the
19 meaning of the CLRA, Cal. Civ. Code § 1761(a).

20 78. As alleged herein, Defendant's business practices are a violation of the CLRA
21 because Defendant deceptively failed to reveal facts that are material in light of the protein
22 claims that were made by Defendant on the principal display panel of its Products.

23 79. Defendant's ongoing failure to provide material facts about its Products on its
24 labels violates the following subsections of Cal. Civ. Code § 1770(a) in these respects:

- 25 a. Defendant's acts and practices constitute misrepresentations that its Products have
26 characteristics, benefits, or uses which they do not have;
27 b. Defendant misrepresented that its Products are of a particular standard, quality,
28 and/or grade, when they are of another;

- 1 c. Defendant's acts and practices constitute the advertisement of goods, without the
2 intent to sell them as advertised;
- 3 d. Defendant's acts and practices fail to represent that transactions involving its
4 Products involve actions that are prohibited by law, particularly the use of
5 misleading nutritional labelling; and
- 6 e. Defendant's acts and practices constitute representations that its Products have
7 been supplied in accordance with previous representations when they were not.

8 80. By reason of the foregoing, Plaintiff and the Class have been irreparably harmed,
9 entitling them to injunctive relief.

10 81. Pursuant to Cal. Civ. Code § 1782, Plaintiff notified Defendant in writing of the
11 particular violations of the CLRA described herein and demanded Defendant rectify the actions
12 described above by providing complete monetary relief, agreeing to be bound by their legal
13 obligations and to give notice to all affected customers of their intent to do so. Plaintiff sent this
14 notice by certified mail to Defendant, at least 30 days before the filing of this Complaint.

15 82. Pursuant to Cal. Civ. Code §§ 1770 and 1780, Plaintiff and the Class are entitled
16 to recover actual damages sustained as a result of Defendant's violations of the CLRA. Such
17 damages include, without limitation, monetary losses and actual, punitive, and consequential
18 damages, in an amount to be proven at trial.

19 83. Pursuant to Cal. Civ. Code §§ 1770 and 1780, Plaintiff is entitled to enjoin
20 publication of misleading and deceptive nutritional labels on Defendant's Products and to
21 recover reasonable attorneys' fees and costs.

22 **COUNT 2**
23 **UNJUST ENRICHMENT**

24 84. Plaintiff realleges the preceding paragraphs as if fully set forth herein and, to the
25 extent necessary, pleads this cause of action in the alternative in the event that Plaintiff has an
26 inadequate remedy at law.

27 85. Under California law, a claim for unjust enrichment "describe[s] the theory
28 underlying a claim that a defendant has been unjustly conferred a benefit 'through mistake,

1 fraud, coercion, or request.” *Astiana v. Hain Celestial Grp., Inc.* (9th Cir. 2015) 783 F.3d 753,
2 762 (quoting 55 *Cal. Jur. 3d Restitution* § 2). Thus, when a plaintiff alleges unjust enrichment,
3 the Court should “construe the cause of action as a quasi-contract claim seeking restitution.”
4 *Rutherford Holdings, LLC v. Plaza Del Rey* (2014) 223 Cal.App.4th 221, 225. Courts in
5 California have allowed unjust enrichment and CLRA claims to proceed in the alternative. *See*
6 *Scheibe v. Livwell Prods., LLC*, No. 23-cv-216, 2023 WL 4414580, at *8 (S.D. Cal. 2023).

7 86. Defendant, through its marketing and labeling of the Products, misrepresented and
8 deceived consumers by misrepresenting that the Products provided 20 grams of fully
9 bioavailable protein that constituted 40 percent the Recommended Daily Value of protein.

10 87. Defendant did so for the purpose of enriching itself and it in fact enriched itself
11 by doing so.

12 88. Consumers conferred a benefit on Defendant by purchasing the Products,
13 including an effective premium above their true value. Defendant appreciated, accepted, and
14 retained the benefit to the detriment of consumers.

15 89. Defendant continues to possess monies paid by consumers to which Defendant is
16 not entitled.

17 90. Under the circumstances it would be inequitable for Defendant to retain the benefit
18 conferred upon it and Defendant’s retention of the benefit violates fundamental principles of
19 justice, equity, and good conscience.

20 91. Plaintiff seeks disgorgement of Defendant’s ill-gotten gains and restitution of
21 Defendant’s wrongful profits, revenue, and benefits, to the extent, and in the amount, deemed
22 appropriate by the Court, and such other relief as the Court deems just and proper to remedy
23 Defendant’s unjust enrichment.

24 92. Plaintiff has standing to pursue this claim as Plaintiff has suffered injury in fact as
25 a result of Defendant’s actions as set forth above.

COUNT 3
BREACH OF EXPRESS WARRANTY

93. Plaintiff realleges the preceding paragraphs as if fully set forth herein and, to the extent necessary, pleads this cause of action in the alternative.

94. Defendant, as the designer, manufacturer, marketer, distributor, and/or seller, expressly warranted that the Products contained 20 grams of fully bioavailable protein that constituted 40 percent of the Recommended Daily Value of protein.

95. Defendant's express warranties, and its affirmations of fact and promises made to Plaintiff and the Class and regarding the Products, became part of the basis of the bargain between Defendant and Plaintiff and the Class, which creates an express warranty that the Products would conform to those affirmations of fact, representations, promises, and descriptions.

96. The Products do not conform to the express warranty that the Products contain 20 grams of fully bioavailable protein because they contain a lower-quality protein with a PDCAAS of less than 1.0.

97. As a direct and proximate cause of Defendant's breach of express warranty, Plaintiff and Class members have been injured and harmed because: (a) they would not have purchased the Products on the same terms if they knew the truth about the Products' protein claim; (b) they paid a price premium based on Defendant's express warranties; and (c) the Products do not have the characteristics, uses, or benefits that were promised.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff respectfully requests the Court grant the following relief against Defendant:

- a. Certifying the Class;
- b. Declaring that Defendant violated the CLRA and/or was unjustly enriched and/or breached an express warranty;
- c. Awarding actual and other damages as permitted by law;

- 1 d. Ordering an awarding of injunctive relief as permitted by law, including enjoining
2 Defendant from continuing the unlawful practices as set forth herein, and ordering
3 Defendant to engage in a corrective advertising campaign;
4
5 e. Ordering Defendant to pay reasonable attorneys' fees and litigation costs to Plaintiff;
6
7 f. Ordering Defendant to pay both pre- and post-judgment interest on any amounts
8 awarded; and
9
10 g. Such other relief as the Court may deem just and proper.

11 TRIAL BY JURY IS DEMANDED ON ANY COUNTS SO TRIABLE.

12 Respectfully submitted,

13 /s/ Charles C. Weller
14 Charles C. Weller (Cal. SBN: 207034)
15 Attorney for Plaintiff
