**Important Announcement: NNB's Exclusive Non-Hygroscopic GeniusPure™ (Alpha-GPC)**

To Whom It May Concern,

We are pleased to announce a groundbreaking development at NNB that will revolutionize the Alpha-GPC market. Our proprietary Alpha-GPC product, GeniusPure™, is now available with unparalleled non-hygroscopic properties.

GeniusPure™ is a result of our commitment to innovation and quality. As the first company to optimize and enhance the hygroscopic characteristics of Alpha-GPC, we have secured a trademark for GeniusPure™. This product is currently offered in two specifications, 70% and 90%, both of which demonstrate exceptionally strong non-hygroscopic properties.

In our dedication to safeguarding our innovations, NNB has submitted patent applications for our non-hygroscopic Alpha-GPC product. We are proud to announce that our patent, with the number PCT/CN2023/113060, covers content specifications ranging from 50% to 99%. Non-hygroscopic Alpha-GPC by NNB is an exclusive product, and we want to make it clear that any manufacturers or brands utilizing non-NNB GeniusPure™ products and promoting them as possessing non-hygroscopic properties may be infringing upon NNB's non-hygroscopic patent.

NNB is fully committed to protecting our intellectual property rights, and we will not hesitate to explore all available legal remedies in cases of patent infringement.

Thank you for your attention to this important announcement. We believe that our GeniusPure™ product will set new industry standards for Alpha-GPC, and we are excited to offer this innovation to our valued partners and customers.

Sincerely,

**Kylin Liao**

CEO & FOUNDER
