

OLD DIETARY INGREDIENT LIST

This list of dietary ingredients is a compilation of old dietary ingredient lists developed by the American Herbal Products Association (AHPA), Council for Responsible Nutrition (CRN), Natural Products Association (NPA) and the United Natural Products Alliance (UNPA).

This list was compiled shortly after passage of the Dietary Supplement Health and Education Act of 1994 (DSHEA). This list is not recognized by the Food and Drug Administration as either official or binding but only as a reference tool. Any person proposing to offer a dietary ingredient for sale under the provisions of DSHEA is advised to seek competent counsel to confirm whether such an ingredient is an old or new dietary ingredient. This list should not be relied upon as the sole basis to determine ODI/NDI status of any dietary ingredient.
